

CYPHER[®] Stent
Designed
for living
LIFE WIDE OPEN[™]

Living life with an ideal stent, drug, and polymer

- Closed-cell design provides structural stability and remarkable outcomes^{1,2}
- Proven sirolimus delivered by a durable polymer provides protection throughout the initial injury response period^{1,2}
 - Controls late loss over time²
 - Protects against TLR over time¹

The most studied. The most used. The most proven.¹

- 75 randomized and nonrandomized studies (over 45,000 patients studied)
- More than 3 million patients treated worldwide
- Studies with data out to 5 years

*cyp*her[®]
Sirolimus-eluting
Coronary Stent
